Lebedev Andrey Alexandrovich

Post: ML developer

Age: 21 years old (November 14, 2000)
Residence: Nizhny Novgorod(Kanavinsky district)
Desired position: ML specialist
Desired salary:from 50,000 rubles
Marital status: not married, no children
Knowledge of foreign languages: English B1
Knowledge of programming languages:
Python(main language)
C++, Java (basic knowledge)
Driving experience: Category B rights (no private car)

Work experience: 1 year

Institute of Applied Physics of the Russian Academy of Sciences, https://ipfran.ru
The Institute is engaged in fundamental research in the field of applied physics.
Post: Laboratory assistant-researcher
Job responsibilities:

1. Development and analysis of mechanisms for the allocation of lines of given directions of two-dimensional signals

2. Analysis of algorithms based on correlation comparison for stability

3. Analysis of the evolution of two-dimensional signals using modern algarithms of object tracking

Achievements:

1. Presentation at the All-Russian Conference "Nonlinear dynamics in Cognitive research - 2021"

Wishes: apply knowledge in the field of higher mathematics and algebra in programming

Higher Education
In **2022** I will graduate from Lobachevsky Nizhny Novgorod State University.
Faculty of Radiophysics, specialty "Applied Radiophysics"

Additional education (courses):
The course "Intel programming course in Python"on creating telegram bots

Links to completed projects in which he was directly involved:
https://nd-cogsci.ipfran.ru/2021/img/NDKI-2021.pdf (p. 45-47)

Skills:
Mathematical, correlation, Fourier analysis; Python; Git, reporting and layout
latex documents; preparation of presentations, B. category rights

About me:

1. Experience with Python (opencv, matplotlib, numpy libraries and similar mathematical tools)

2. Deep knowledge in technical sciences

3. Knowledge of English

4. Work experience in a team of 3 people

5. At the moment I am writing a bachelor's thesis on the topic: "Methods of tracking fluorescent areas in photodynamic therapy"

6. In school was engaged in Olympiad programming (solving problems on programming)

7. **Strong qualities:** decency, organization of teamwork, ability to build business communication, the ability to work in a team alone, the ability to set goals and get the desired result;

8. The main thing in my work for me is the sense of benefit that I bring to the organization, as well as the development of both myself and the company's own growth indicators, the impact on its growth and recognition in the international arena. I am ready to develop both inside and outside the company, focusing on professional growth.

Interested in your proposal. I am ready for further stages of the interview.
